

STEADY AS YOU GO

Falling is **NOT** a normal part of aging

WHAT CAUSES IMBALANCE

TOO MANY FALLS

Falls are the leading cause of accidental death and injury in people 65 and older.
33% of older adults fall annually ...

and only 1/2 talk to their doctor about it

FIND THE CAUSE

1. Talk to your doctor
2. Get screened for BPPV: Crystals in your inner ear can get dislodged, but this can be corrected!

FALLS PREVENTION

MEDICAL

Visit your doctor for a checkup
Have your eyes examined
Make diet & lifestyle changes

BALANCE

Exercise, such as yoga or tai chi
Physical therapy

SAFETY

Use proper support, such as a cane, walker or handrails
Use proper lighting
Use proper eyewear and footwear

WHAT SHOULD I DO?
